REMOVAL OF ASBESTOS LAYERS

ABOUT US

High-pressure water jetting is a sustainable technology that enables innovative surface treatment. This ensures no customer request is left unmet, and your individual requirements are fully met.

Our experts are here to support you in optimising your surfaces. Trust in our experience and expertise to achieve the best results – we have the perfect solution!

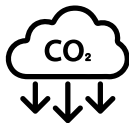

ECO-
FRIENDLY

EFFICIENT

LOW
EMISSIONS

FLEXIBLE

GENTLE

WATER
TREATMENT

**MAKES ROAD USERS
AND CLIENTS HAPPY.**

**ROUGHENING | RETEXTURING
BITUMEN STRIPPING | TEXTURE BLASTING**

The use of our high-pressure water jetting technology opens up new dimensions. The following innovative methods are currently available for the fast, efficient, and eco-friendly modification of surface properties: surface roughening, retexturing, bitumen stripping, and texture blasting.

BEFORE SAFETY
IS RUN INTO THE GROUND.

CLEANING | RUBBER REMOVAL

Safety First – our high-pressure water jetting machine not only creates a holiday atmosphere at the airport, but also ensures a safe arrival at your destination. With the surface treatment machine, the ARC-3400 (Airport Runway Cleaner), we guarantee safe take-off and landing in particular by professional rubber removal on runways.

**BRINGING LIGHT
INTO DARKNESS.**

BRIGHTENING

Brightening your asphalt surfaces offers numerous benefits: improved safety and driving comfort, reduced energy consumption and lower surface temperatures. With our high-pressure water jetting technology we are your reliable partner and expert for the professional brightening of traffic areas.

BRIGHTENING

BRIGHTENING

MARKS
THE CHANGE.

ROAD DEMARKING IMPROVING REFLECTION

With our high-pressure water jetting technology, we remove the “old” to make way for the “new.” Regardless of the marking material – paint, cold plastic, thermoplastic or tape – we efficiently remove markings from roads, runways, racetracks and parking areas.

**LICENSE
TO REMOVE.**

REMOVAL OF ASBESTOS LAYERS

We are proud to now be licensed for asbestos layer removal! Our high-pressure water jetting technology removes asbestos safely and efficiently while meeting the highest environmental and safety standards. Rely on our expertise and state-of-the-art equipment – for a healthy and worry-free future.

WE MAKE TRAFFIC SURFACES FUTURE-PROOF

Welcome to OAT! Since 1977, we have specialised in the renovation and maintenance of traffic areas and are recognized experts in this field. Our passion is the creation of traffic pavements meeting highest quality standards.

We rely on innovative technologies to provide our customers with environmental benefits while guaranteeing top quality. Our work is more than just a job - it is a task for the future focusing sustainability and innovation.

Our team consists of experts who know their craft and work with passion and commitment on every project. We are proud to create traffic pavements that are not only aesthetically pleasing, but also meet the highest standards of quality and durability.

Contact us and convince yourself of our commitment, our passion, and our expertise in the field of traffic surface construction. We look forward to providing you with tailored solutions that meet the highest standards.

**WHEREVER WE ARE NEEDED,
WE HAVE THE SOLUTION!**
